# 1 Year Re-Incarceration Rate

## FY 2013 Releases by Frequency of Release FY 2013

The FY 2013 one year re-incarceration rate was 19% for all inmates, this is 3.2 % lower than the one year re-incarceration rate in FY 2012 and 2% higher than in FY 2010. Non-federal inmates who are re-incarcerated have a significantly higher incidence of mental illness, but are similar to federal offenders who are re-incarcerated in most other attributes. Increase in property crimes and reduced levels of social services may have contributed to the increase in re-incarceration rate.
