

Where Did 9th Graders Go to School the Previous Year? Feeder Pattern Analysis of DCPS High Schools

The table below describes where 9th graders in SY2013-14 attended school the previous school year (SY2012-13). The purpose of the table is to show the middle schools that "feed" into DCPS high schools. In some cases, the feeder middle schools were the designated DCPS feeder schools (bolded and italicized) but they could have been other DCPS or public charter middle schools as well. An example of how to read this table is 88 9th graders at Ballou HS attended Hart MS as 8th graders the prior school year, 31 9th graders from Ballou attended Johnson MS the year prior, 50 Ballou 9th graders repeated the grade, 33 Ballou students had no information about where they attended school the year before, and 66 Ballou 9th graders came from other middle schools (which were grouped into an "other" category because each school had 5 or less students and had to be combined for confidentiality purposes).

DCPS High Schools in SY2013-14	# of 9th Graders in SY2013-14	% 9th Graders in SY2013-14	Schools Where These 9th Graders Attended the Prior Year (SY2012-13) (Designated DCPS MS feeder schools in bold/italic)

Source: OSSE student-level data matched between SY2013-14 and SY2012-13

Notes: Data includes only those students who were in 9th grade in SY2013-14. Schools bolded and italicized indicate official middle and education campus school feeders for the indicated high school. "No data available on school attended last year" in the SY2012-13 column means that the 9th grader could not be matched to their school attended the year prior because either the students were new to the DC public education system in SY2013-14 or that there is administrative matching error. "Other" in the SY2012-13 column refers to students attending other DCPS or public charter schools. These schools could not be displayed for confidentiality purposes because the number of students was less than or equal to 5 students.
