CENTER LEG FREEWAY

http://www.tripwithinthebeltway.blogspot.com/2007/03/i-95-center-leg-todays-i-395-3rd_18.html

The Washington Post **City Life** in Greater Washington

EVENTS TODAY
OBITUARIES
AMUSEMENTS

SECTION C THURSDAY, DECEMBER 28, 1967 C1

FUTURE HIGHWAY—This area of current alleyway is the site of the center leg of the I-95 Freeway near the Capitol. The view to the north is from the roof of the Esso Building on Constitution Avenue sw, which will be razed for the project, and shows at upper left Holy Eosary Church, M and F Streets sw, which will not be torn down.

A power shovel attached to a crane is tearing down the Esso Building to clear the path for the Freeway.

This is the Freeway site south of the Esso Building. Arrow indicates point where raising is in progress.

Draft Goals
& Opportunities

**INTERACTIVE
FEEDBACK**

DRAFT GOALS & OPPORTUNITIES

DRAFT GOALS

1. **Enhance the livability and quality of life** in the area as a residential neighborhood through improved community facilities, public amenities, and safety.
2. Use downtown locational advantages (proximity to the Capitol and Union Station) to **maximize the area's significantly underutilized development potential**.
3. **Diversify the mix of land uses** across the study area, including more residential south of Massachusetts Avenue and additional residential as infill north.
4. Encourage **a diverse housing stock** and range of affordability.
5. **Leverage institutional and organizational anchors** (BIDs, CID, Georgetown Law, Gonzaga, among others) to promote academic, commercial, residential, and governmental interaction and synergies.
6. Explore strategies that **promote job growth** across the board by leveraging the strength of existing niche industries, such as the hospitality sector.

DRAFT GOALS

7. **Preserve and enhance historic resources, monumental viewsheds, civic spaces, and outstanding architecture** that showcase the character and history of the District as well as the nation.
8. **Repair the disconnected street network** to restore the historic urban fabric, decrease vehicular congestion, and improve east-west connectivity.
9. Pursue a **balanced approach to transportation**, creating a pedestrian-friendly neighborhood with improved transit accessibility, bicycle infrastructure, and vehicular circulation.
10. **Maximize sustainability** through the implementation of actions and policies that promote best practices in such fields as energy efficiency and stormwater management from the Sustainable DC plan.
11. Create **vibrant, comfortable, walkable streets** with active ground-floor uses, mature tree canopy, and strong pedestrian links.
12. Provide **varied parks and open spaces** that serve residents, workers, and visitors of all ages.
